

Corporate information

Here you will find detailed information about our company, our philosophy and partnerships etc. Please visit our website at www.aclinstruments.com for further information and news.

Introduction

Understanding oxidation – ACL Instruments provides you with innovative solutions to characterize oxidative decomposition reactions. We endeavor to be exceptional, which is why we are constantly improving our innovations. Because we value our customers, we consider you as partners with whom we want to ensure close collaboration to provide mutual benefits. We are an independent private company that is proud of its Swiss roots and provides added value in Switzerland.

Philosophy

We want our products and services to stand for exceptional quality and know-how. For the benefit of our customers, we continuously optimize and improve our instruments and customer services.

As experts in the field, we use our know-how to produce viable innovations. To maintain the highest quality standards, we pledge ourselves to Switzerland – this is where we provide our added value. We guarantee the highest standards (Swiss made) when carrying out customer mandates, and our instruments come with a 12-month warranty.

Through collaboration with our partners, we provide access to an array of extremely useful products and possibilities.

Partnership

We build our partnerships on the basis of mutual trust and to ensure benefits for both sides.

Alytech (Juvisy-sur-Orge, France) is the distribution partner for our products in France. www.alytech.fr

Prosense (Munich, Germany) is the distribution partner for our products in Germany. www.prosense.net

WAD (Shanghai, PRC) is the distribution partner for our products in China. www.worldwide-china.com

We use the thermokinetic software of AKTS (Sierre, Switzerland) to analyze and predict the oxidation behaviour of our CL measurement data. www.akts.com

Swiss-made

We measure extremely weak phenomena, which require extraordinary performance and high quality standards. We are never satisfied with our achievements, which is why we continuously strive to actively improve our products and performance. To provide products of the highest quality, we pledge ourselves to Switzerland and sustainable entrepreneurial values.

Every working step of our customer services is carried out in Switzerland, as is the development, production and assembly of our instruments.

Your added value

Our products are extremely diverse and can be tailored to your specific requirements. This applies to our services as well as our analysis equipment. Our highly sensitive instruments can be adapted to your growing requirements at any time, and their functionality can be extended thanks to innovative modules.

If you have questions on your product or application concerning oxidation reaction, stability, or safety etc. please don't hesitate to contact us. We will provide you with immediate advice. We also offer promotional services to enable you to understand the capabilities of our products.

Location map

ACL Instruments is located in Kerzers, close to the border between German-speaking and French-speaking Switzerland. You can easily get to our site by car or by train.
